

Mobile Solutions for the Hospital

*High-end Ventilation, Resuscitation and Monitoring in
Emergency Medicine and Transport Services*

- Solutions for:**
- **Emergency room**
 - **Intra-hospital emergencies**
 - **Intra-hospital transfer and Inter-hospital transport**

Your Specialist for Emergency and Transport Medicine

Emergency room

Comprehensive pre-hospital and follow-up treatment

In the hospital emergency room the effective treatment of a patient, including secondary diagnostics, greatly depends on the right pre-hospital treatment provided by emergency medical services. Our product solutions help you to safely and surely meet tough clinical demands for procedures ranging from suction to differentiated ventilation.

Our product solutions

Suction pump ACCUVAC Rescue: effectively clears patient's airways

MODUL CPAP: effective CPAP therapy

Defibrillation and monitoring unit MEDUCORE Standard and ventilator MEDUMAT Standard²: Defibrillation, monitoring and oxygen therapy in one hand

Ventilator MEDUMAT Transport: high-quality ventilation

Emergency case ULM CASE: perfectly organized emergency equipment

For pre-hospital treatment at the emergency site, enroute to hospital and in intra- and inter-hospital transport, WEINMANN Emergency products offer you the highest levels of quality and safety in diagnostics and treatment of your patients.

Our modular products satisfy all your emergency medical equipment needs for mobile ventilation and monitoring or resuscitation. We offer highly efficient and effective devices for three special areas

Intra-hospital emergency medical care

Lightning-fast response in an emergency

Our modular product design lets you put together the medical equipment that fits your specific requirements. For fast and effective response in an emergency with exactly what you need.

Our product solutions

Defibrillation and monitoring unit MEDUCORE Standard and ventilator MEDUMAT Standard²: Defibrillation, monitoring and oxygen therapy in one hand

Ventilator MEDUMAT Standard²: Emergency ventilation on a new level

Resuscitator COMBIBAG: manual ventilation

Ventilator MEDUMAT Easy CPR: voice prompts for resuscitation and ventilation

Suction pump ACCUVAC Basic or ACCUVAC Rescue: clears the airways effectively

Emergency backpack RESCUE-PACK: with emergency equipment quickly and with both hands free on the way to the patient

of usage in hospital: emergency room, in-hospital emergencies and intra-hospital transfer and inter-hospital transport. For mobile airway clearance, differentiated ventilation, monitoring and defibrillation our product quality meets the demands for ruggedness in emergency medical services and fulfills the demanding requirements for hospital treatment.

Intra-hospital transfer and inter-hospital transport

Top quality for hospitals

Today's intensive medical care requires frequent transport of patients. WEINMANN Emergency offers you effective solutions for high-quality mobile ventilation therapy and monitoring for both intra-hospital transfer and inter-hospital transport. MEDUMAT Transport is the perfect product for the job. In addition to several ventilation modes and non-invasive ventilation, the device helps you keep an eye on your patient's ventilation with a range of monitoring options.

Our product solutions

Ventilator MEDUMAT Transport:
high-quality transport ventilation

Ventilator MEDUMAT Standard2:
Emergency ventilation on a new level

Fast On-Site Service

Chances for survival may depend on a device's readiness for use. Our on-site technical service guarantees your equipment's reliability. Together with our partners we set up local service structures and train technicians in the service of our products.

Product overview

Ventilation and oxygen therapy: for all cases

Our ventilation technology sets standards for manual or mechanical ventilation, from the emergency room to inter-hospital transport of intensive care patients. Safe and reliable operation and top-quality care.

Portable system LIFE-BASE: exactly what you need

Only our portable system LIFE-BASE lets you put together a customized mobile medical care unit for your emergency and hospital transport patients. You can combine ventilation, ECG and SpO₂ monitoring and defibrillation in one portable system, with or without an integrated oxygen cylinder.

Bedside stand MEDUcart: everything is secure and mobile

The bedside stand MEDUcart safely accommodates all required devices and components for ventilation and oxygen supply and accessories. Simple assembly and safe operation.

Proven suction

With the help of our mobile suction pumps ACCUVAC Rescue and ACCUVAC Basic you can clear the patient's airways simply and safely.

Emergency cases and backpacks: everything on hand

Our emergency cases and backpacks organize and safely transport your medical equipment. Once at the scene of an emergency, you'll find everything in its proper place, ready for use. Based on the concept of an emergency case, our backpack gives you the added benefit of leaving your hands free to, from and at the scene of an emergency.

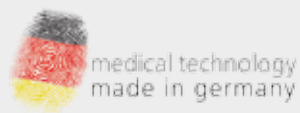

Defibrillation and Monitoring: greatest chance of survival

By adding MEDUCORE Standard as a module on the portable system LIFE-BASE, you expand the ventilator and oxygen inhalation unit with the essential functions ECG and SpO₂ monitoring and defibrillation. With just one hand, you can carry the portable system that monitors critical patients and provides immediate access to all the functions you need for the care of resuscitated patients.

Simply Professional

You can rely on WEINMANN Emergency. We set the standards for mobile solutions in patient ventilation. Our 130 years of experience and close association with professional users in emergency medical services, armies/public authorities and hospitals have led to the development of intelligent and perfectly coordinated technologies. In conjunction with the professionals in emergency, transport and disaster medicine, we pursue our shared goal of saving human lives.
